## TEGUH PHARMA (M) SDN BHD

### NOVATEK Corrective & Preventive Actions (CAPA Solutions)

NOVATEK software enables companies to **improve quality, reduce costs, and meet compliance requirements by automating and centralizing the CAPA process using an integrated approach.** NOVATEK manages CAPAs originating from any source, and enables organizations to integrate and relate investigation and corrective action processes.

The flexible NOVATEK architecture enables your organization to log any problem and manage all related investigation tasks and actions. Investigation "tasks" are assigned to investigators who access and update them from their personalized dashboards. NOVATEK improves the collaboration process by enabling investigation teams to share results and use drill-down selection tools to walk through root cause analysis steps. Electronic workflow management controls the process and improves timeliness of all CAPA plan development, approval, implementation, verification and effectiveness.

NOVATEK monitors key milestone dates to ensure investigations and CAPAs are closed on time and escalates latent issues based on simple to complex conditional logic. The system also improves the reporting and trending processes with built-in, easy-to-use search tools and integrated reporting that provides managers the critical quality information necessary to make confident GMP decisions.
